Applied-research AI engineer with 9+ years across industry and academia. I build production-grade computer vision and LLM systems end-to-end—data, training, evaluation, and deployment—and teach safe, effective AI use to teachers, undergraduates, and K-12 learners. Former NVIDIA engineer and DLI Ambassador; currently leading deep-learning pipelines for image/fluoroscopy analysis in health-tech. Comfortable translating clinical and product needs into scalable ML/LLM solutions and advising startups from ideation to shipped features.

Professional Experience:

2025 – Present: **Lead AI Software Engineer – “Kama Research & Development”**

- Designed predictive models and deep learning pipelines supporting heart procedure diagnostics.
- Built scalable ML infrastructure aligned with clinical and FDA regulatory workflows.
- Spearheaded cross-functional integration between backend systems and AI model serving.

2023 – 2025: **Senior Software Engineer | Applied Deep Learning – “Kama Research & Development”**

- Leveraging Python and advanced Machine Learning tools to develop predictive models and algorithms that aid in addressing challenges related to heart procedures.
- Collaborating with a multidisciplinary team of medical professionals, Algorithm team, and software engineers to translate medical requirements into effective AI solutions.
- Utilizing state-of-the-art AI techniques to automate and improve the accuracy of diagnostic processes, leading to more reliable and safer heart surgery procedures.

2023 – Present: **AI Advisor – “Algnite”**

- AI Product Strategy: Defined Startup roadmaps, data strategies, and evaluation plans; prioritized high-ROI use cases.
- LLM Integration: Designed multi-agent workflows (CrewAI/OpenAI SDK/AutoGen), retrieval pipelines (RAG), and safety/guardrail policies.
- Delivered workshops for founding teams on LLM/DL, prompt engineering, and architecture best practices.
- Trained schoolteachers and undergrad students (ages 7+ and up) on AI use, prompt safety, and ethical adoption.
- Developed curriculum under national frameworks for public sector and private institutions.

2018 – 2023: **DLI Jetson AI Ambassador /SW Engineer/ Firmware Engineer– “Nvidia”**

- DLI Ambassadors are a select group of DLI Certified Instructors committed to teaching DLI instructor-led workshops at universities, academic conferences at no cost exclusively for academic students, staff, and researchers. In addition, as a Jetson AI Ambassador, I am teaching “Getting Started with Jetson Nano”.
- Design and build internal & customer tools using C++, C, Python, Angular, Qt, and other technologies.
- Collaborate with diverse teams (FW, Drivers, Tools, PHY, Architecture, etc.) to deliver complex projects.
- Verified and designed firmware using OOP Verification infrastructure built from scratch (Python, C++, and bash).

2017 – 2018: **Software Development Engineer, Architecture group – “Ceva-DSP”**

- Developed and managed SW infrastructure, tools, and scripts used by the architecture team using C/Python/C++.
- Implemented and verified the C-model of the DSP’s instruction set.
- Provided VLSI support and communication.

2012-2016: **Project Manager – “Kaco New Energy”:**

- Managed the design and execution of a 3MW solar energy project, coordinating with subcontractors and electrical teams to deliver efficient energy solutions.
- Led project teams to complete installations on time and within budget.

2013-2016: **Lecturer & Project advisor – “ORT Colleges”:**

- Education: Advised final-year projects for practical electrical engineering students.
- Curriculum Development: Developed and lectured courses on electrical software and tools.

Education:

- 2024 – 2026 **Master's degree, Artificial Intelligence Master's degree**, University of Liverpool
- 2021 –2022: **Entrepreneurship/Entrepreneurial Studies**, Reichman University
- 2015 –2016: **"Entrepreneurship specialization" & "Mini MBA"**, Maryland University & Microsoft
- 2008 –2012: **B.Sc. Electrical & Electronics Engineering**, Tel Aviv University

Certifications:

- **Entrepreneurship/Entrepreneurial Studies**, Reichman University (2023)
- **AWS SageMaker Machine Learning Engineer**, Udemy (2022)
- **AI for Medicine Specialization**, DeepLearning.AI (2022)
- **IBM AI Engineering Professional Certificate**, IBM (2020)
- **Data Science Specialization**, University of Michigan (2018)
- **Android App Development with Java**, London App Brewery (2017)

Professional skills:

- **AI/ML:** Pytorch, Train, Deployment, MLOPs, Numpy, Pandas, Machine Learning, Sagemaker AWS, Deep Learning, Computer Vision, Image processing, etc.
- **Programming languages:** C, C++, Java, Android, Python, SQL, Angular, Nodejs, MongoDB, Docker, Linux, Windows, Visual Studio, Networking, AWS.
- **Hardware tools:** VIRTUSO, PSPCE, ALTIUM Designer.
- **Managing tools:** MS Project Professional, Excel.
- **High voltage tools:** AutoCAD, ABB DOC, Ecodial, Dialux, ETAP, PVsyst, Powador PV-pilot.

Volunteer experience:

2017 – Present: **Co-Founder & CTO – “Algnite”**

Mission: Established a nonprofit organization to empower Arab individuals from social and geographic peripheries to enter the entrepreneurial and programming worlds.

Program Development: Designed workshops and courses bridging entrepreneurship and AI & programming.

Languages:

- Arabic: Native, Hebrew: Bilingual, English: Advanced
